

ASI-700-49A - Handle

Description

ASI-700-49A - HANDLE

Condition: Repairable
Unit of Sale: Sold Per Each

PART NUMBER INFORMATION

Unpunctuated: ASI70049A

AS STANDARD

AS (Aerospace Standard) components are designed to meet the high-performance and safety requirements of the aerospace industry. Manufactured from high-quality materials like **titanium**, **stainless steel**, and **specialized alloys**, AS parts ensure durability and performance in extreme environments. Each AS part is coded to ensure compliance with aerospace industry standards and provides traceability for safety-critical applications. Refer to **specification sheets** for precise details.

HISTORY

AS STANDARDS were created by **SAE International** (Society of Automotive Engineers) to address the growing complexity of aerospace manufacturing. The introduction of these standards allowed for consistent quality across the aerospace supply chain, improving both the production and maintenance of aircraft and spacecraft.

Condition and Unit of Sale

REPAIRABLE: This item is in repairable condition, meaning it is currently non-functional or has minor defects, but it can be restored to full working order with proper repairs. The product has the potential to be fully operational after maintenance or refurbishment. It is ideal for those who have the skills, tools, or resources to perform the necessary repairs, making it a cost-effective solution compared to purchasing a new item.

SOLD PER EACH: This item is sold individually, with the price listed for a single unit. Perfect for purchasing the exact quantity needed without the requirement to buy in bulk. For larger quantities, consider reviewing any available bulk pricing options.
