

MS21919WH7 - Clamp

Description

MS21919WH7 - CLAMP

Condition: Surplus
Unit of Sale: Sold Per Each

PART NUMBER INFORMATION

Unpunctuated: MS21919WH7

MS STANDARD

MS STANDARD (Military Standard) components are engineered to meet the rigorous requirements of military and aerospace applications, ensuring exceptional **reliability** and **performance** under demanding conditions. Crafted from high-quality materials like **corrosion-resistant steel** and **anodized aluminum alloys**, MS components are designed to withstand extreme environments such as high temperatures and corrosive conditions. Each MS part guarantees compliance with strict standards and is identified by its specific part number. Refer to **specification sheets** for details.

HISTORY

MS STANDARDS were developed in the mid-20th century by the U.S. Department of Defense to streamline parts procurement for military systems. By creating these standards, the military ensured that parts could be reliably interchanged across various platforms, improving supply chain efficiency and reducing maintenance complexity.

Condition and Unit of Sale

SURPLUS: Surplus items can be either new or used but remain in good condition. These parts may lack manufacturer documentation but are typically sourced from excess inventories or decommissioned systems. While these products are priced lower due to their surplus nature, they are verified to be functional and suitable for various applications. Surplus parts are an excellent choice for budget-conscious projects and repairs.

SOLD PER EACH: This item is sold individually, with the price listed for a single unit. Perfect for purchasing the exact quantity needed without the requirement to buy in bulk. For larger quantities, consider reviewing any available bulk pricing options.
