

NAS1738E6-3 - RIVET

Description

NAS1738E6-3 - RIVET

Condition: New
Unit of Sale: Sold Per Each

PART NUMBER INFORMATION

Unpunctuated: NAS1738E63

NAS STANDARD

NAS (National Aerospace Standards) components are meticulously designed to meet stringent aerospace specifications for **reliability** and **precision**. Made from materials such as **titanium**, **stainless steel**, and **alloy steel**, NAS components are built to perform under high-stress conditions. Each part is carefully coded and documented to ensure compliance with industry standards. Refer to **specification sheets** for accurate dimensions and application suitability.

HISTORY

NAS STANDARDS were established in the 1940s by the **Aerospace Industries Association** (AIA) to meet the growing needs of the U.S. government and military. These standards were vital in creating reliable, interchangeable parts for aircraft, ensuring that components could be used across different platforms without compatibility issues. The system has since become foundational in aerospace part design.

Condition and Unit of Sale

NEW: These parts are classified as new and come with one or more of the following supporting documents: pick tickets, packing slips, or original labels from the manufacturer. They may also include certifications such as FAA 8130, ATA 106 forms, a Certificate of Conformance (CoC) from the manufacturer, ISC Certification, FAA 121 authorization, or JAA Form 1. These documents verify the authenticity and traceability of the parts, making them suitable for regulated industries where stringent documentation is required.

SOLD PER EACH: This item is sold individually, with the price listed for a single unit. Perfect for purchasing the exact quantity needed without the requirement to buy in bulk. For larger quantities, consider reviewing any available bulk pricing options.
